PROJCETS

Online Book Store(Minor-project)

 This is an online book store involving user authentication, book browsing, shopping cart, checkout and order history.

Prediction of Cardiovascular Disease by Using a Hybrid Model of Machine Learning Algorithms

(Major-project)

- Utilizing a hybrid Model of Machine Learning algorithms enhances cardiovascular illness prediction by combining different algorithms, using its ensemble learning for improved accuracy.
- O Compared different machine learning techniques like Decision Tree, Random Forest, XGboost to assess their effectiveness in heart disease prediction.
- This innovative approach combines models, resulting in a more accurate and efficient predictive system and also optimizes the errors.

SEMINARS AND WORKSHOPS

- Presented a seminar on" Capsule Camera".
- Presented a seminar on" Introduction to Machine Learning".
- Participated in 3-days workshop on" AWS Cloud Computing".

ACHIEVEMENTS/AWARDS

- Backed the first runner up position in science exhibition projects 2016.
- Recipient of RDT-scholarship for academic excellence and displaying dedication to learning.
- Foundation of Machine Learning Julia Academy

SOFT SKILLS
